The Lettmann Bullett River Kayak

This kayak is unique in todays market. Designed by the Lettmann team in 1999 its pedigree is the slalom boat and then attributes were added to make it a good all round whitewater boat, thus making it much shorter and higher volume but keeping some aspects of the original slalom performance. The Hull is semi flat and so feels stable for novices on flat water but is relatively narrow and so easy to roll. Take the boat down a rapid and its narrow hull is fast and gives a quick edge response like a slalom boat. This also makes it great for surfing.

The Bullett is 255cm long, 62cm wide and has a volume of 225 litres and made of high density PE. The cockpit is 86cm in length which is a keyhole size. The boat is suitable for kids and adults up to 110kg in weight. There are two versions available; ww spec and centre spec.
